## Wake up from the winter blues and start a new world in the spring!

Are you ready to participate in the change you wish the world to become? Do you feel overwhelmed by how you can make a difference in the global plan? A Future Human takes care of themselves, their family and environment, and has a pro-planetary view about how we can live and do business differently on the planet.

Explore 10 simple ways to recognize your future human skills and spiritual potential. During the course of our retreat, we will use kinesiology (muscle response testing) techniques with intuitive healing methods to determine your best strengths and future human capacities.

To demonstrate how to use these powerful capacities in everyday life, we will cover topics related to food and nutrition, education, business, technology, spiritual intelligence and most importantly – how to live according to your principles to make the biggest changes in your life.

#### Kerryn Sedgman

##### Lead Facilitator

Kerryn is a kinesiologist and author from Australia with over 30 years experience in teaching, clinic and development of kinesiology schools and programs that are internationally recognized.

As a long time teacher and practitioner of the inner traditions, Kerryn sees this point in history as the time to wake up and do what we came here to do and evolve the planet.
